Summary

Computer Science engineering student focused on Cloud and DevOps, with hands-on experience in Kubernetes, Docker, CI/CD and Azure. Seeking a final-year internship in DevOps, Cloud or Platform Engineering.

Education

ESPRIT – Private Higher School of Engineering and Technology tunisia • september 2022
Computer Science

Skills

☞ Cloud & Infrastructure	☞ DevOps & GitOps	☞ Observability	☞ Backend
Azure, AKS, OpenStack, kubernetes, linux, docker, terraform	jenkins, ArgoCD, Git, CI/CD, bash, Helm	Prometheus, Grafana, Alertmanager	Java, Spring Boot, Python, SQL, MySQL

Experience

SIGA tunisia
Software engineer intern July 2025 – September 2025

- Structured the application across 3 main components: Angular frontend, Spring Boot backend and MySQL database.
- Implemented JWT authentication and role-based access control using Spring Security.
- Developed REST APIs for project and task management and integrated them with the Angular frontend.

SIGA Tunisia
Cloud / DevOps Engineering Intern July 2026 – September 2026

- Containerized and deployed a **3-component application**Angular frontend, Spring Boot backend, MySQL database on Azure Kubernetes Service AKS.
- Built a Jenkins CI pipeline with **3 automated stages**: application build, testing, and Docker image creation.
- Implemented GitOps continuous delivery with ArgoCD, synchronizing Kubernetes deployments from a dedicated manifests repository to AKS.
- Structured the application across **3 Git repositories**for frontend, backend, and Kubernetes deployment manifests.
- Managed Kubernetes configuration using **4 core resource types**: Deployments, Services, ConfigMaps, and Secrets.

Projects

Private Cloud Infrastructure & Kubernetes Platform October 2025 – March 2026

- Built a **multi-node OpenStack environment** providing compute, networking, and storage resources for cloud workloads.
- Deployed a **multi-node Kubernetes cluster** on OpenStack using kubeadm.
- Created Kubernetes manifests using **4 resource types**: Deployments, Services, ConfigMaps, and Secrets.
- Deployed a monitoring stack with **3 components**: Prometheus, Grafana, and Alertmanager.
- Used Helm to deploy and manage monitoring components and troubleshoot Kubernetes scheduling, networking, storage, and resource issues.
