Skills

☞ Cloud & Infrastructure

Azure, AKS, OpenStack, kubernetes, linux, docker, terraform

☞ DevOps & GitOps

jenkins, Argo CD, Git, CI/CD, bash, Helm

☞ Observability

Prometheus, Grafana, Alertmanager

☞ Backend

Java, Spring Boot, Python, SQL, MySQL

Education

ESPRIT – Private Higher School of Engineering and Technology

Engineering

Computer Science

tunisia • 5th Year • Expected

Graduation: 2027

Certifications

CCNA: Switching, Routing, and

Wireless Essentials

Cisco

Languages

English

French

Arabic

Summary

Computer Science engineering student with hands-on experience developing applications and deploying containerized workloads on Kubernetes and Azure AKS. Experienced with Docker, Jenkins, Argo CD, GitOps, OpenStack, Terraform and Ansible. Seeking a final-year internship in DevOps, Cloud, or Platform Engineering.

Experience

SIGA

tunisia

Software engineer intern

Jul 2025 – Sep 2025

- Developed a web application to manage projects and tasks for multiple teams, Spring Boot as Backend and Angular as Frontend and MySQL for the database

SIGA

Tunisia

Cloud / DevOps Engineering Intern

Jul 2026 – Sep 2026

- Containerized the Task Manager application using Docker and prepared it for deployment on Azure Kubernetes Service (AKS).
- Built a Jenkins CI pipeline to automate application build, testing, and Docker image creation.
- Implemented GitOps-based continuous delivery using Argo CD and a dedicated Kubernetes manifests repository.
- Deployed and managed the application on AKS using Kubernetes manifests and configured the delivery workflow from Git to the cluster.

Projects

Private Cloud Infrastructure & Kubernetes Platform Oct 2025 – Mar 2026

OpenStack • Linux • Networking • Kubernetes • Docker • kubeadm • Helm • Prometheus • Grafana

- Deployed a multi-node OpenStack private cloud with compute and networking resources for application workloads.
- Configured OpenStack networking, including networks, routers, and security groups.
- Deployed a multi-node Kubernetes cluster on OpenStack using kubeadm.
- Containerized applications using Docker and created Kubernetes manifests for Deployments, Services, ConfigMaps, and Secrets.
- Deployed Prometheus and Grafana with Helm for cluster and application monitoring.
- Troubleshoot pod scheduling, resource, networking, and storage issues.
